Clearing your Calendar Date

This feature allows you to quickly remove the date filter applied to your calendar view.

When you select a date, the system shows all shifts starting from that date forward. Instead of having to click the date again to remove it, you can use the **clear icon** located at the bottom right of the screen. Tapping this icon instantly removes the selected date filter, giving you a full view of all available shifts without restrictions. It’s a faster way to reset your calendar and explore other options without extra steps!

If you encounter any issues or have further questions, don’t hesitate to reach out to KARE Support.
